EDUCATION

Indian Institute of Information Technology (IIIT) Nagpur

Pursuing a Bachelor of Technology in Computer Science Engineering

Aug 2022 - Present

- **Relevant Coursework:**

Data Structures and Algorithms, Operating Systems, Computer Networks, Object-Oriented Programming, Database Management, Computer Architecture

Shreeram Model High School

XII (CBSE) — 94.4%

Faridabad, Haryana

2022

SKILLS

Languages: C/C++, JavaScript, Python, SQL, HTML, CSS, Linux Shell Scripting

Frameworks: React, Node.js, Express.js, Next.js, Tailwind CSS

Developer Tools: Git, VS Code

Libraries: Pandas, NumPy, Matplotlib

Soft Skills: Communication, Problem-Solving, Teamwork, Attention to Detail

PROJECTS

ByteBlog | *HTML, CSS, JavaScript, React, Tailwind CSS, Redux, Appwrite*

- Built and implemented a fully-featured blogging platform using React for a dynamic and responsive user interface, enhancing user experience across devices
- Users can sign up or log in, view blogs in 'My Feed' Section, upload their own blogs, edit or delete previously uploaded blogs, manage account details with ease
- Deployed ByteBlog at <https://byte-blog-wine.vercel.app/>

Personal Landing Page | *HTML, CSS, JavaScript, Github*

- Developed and deployed a personal landing page using HTML, CSS, and JavaScript, showcasing portfolio projects and personal information.
- Implemented responsive design to ensure compatibility across various devices, optimizing the user experience for both mobile and desktop views.
- Hosted on GitHub Pages at <https://aakash0101x.github.io/>, enabling seamless and free hosting with continuous updates through version control.

Hotel Booking System | *C++, Object Oriented Programming*

- Programmed a Hotel Booking System utilizing C++ and Object Oriented Programming (OOP).
- Integrated features for room booking, client management, and billing, with an emphasis on modularity and code reusability.
- Enhanced system efficiency by integrating advanced data structures and algorithms, leading to a 30% reduction in response time for user queries within the Hotel Booking System developed using C++.

College Management Project | *React, JavaScript, Tailwind CSS, Express.js, MySQL, Node.js*

- Developed a full-stack College Management System enabling efficient role-based management for students, faculty, and administrators.
- Designed and integrated key features such as dynamic notice tickers, image sliders, admission forms, and role-specific dashboards for enhanced usability.
- Designed a secure backend with Express.js to handle CRUD operations for student and faculty data, grievances, feedback, and admission approvals.
- Optimized application performance and user experience by leveraging Vite for development and a responsive Tailwind CSS design.

CERTIFICATIONS

Google Cybersecurity Certificate | *Feb 2024*

- Acquired expertise in cybersecurity fundamentals, including threat detection, network security, and cryptography.
- Developed practical skills in security operations and incident response through hands-on labs and real-world projects.
